Over 95,000 people are injured and millions of dollars are lost each year in forklift incidents. Now you must comply with OSHA's new training standards, aimed at greatly reducing those injury statistics and related costs.

McFatter Technical College, a Broward County Public School, is offering a one-day certification course at our facility or yours!

Fine tune your employees' operating skills and refresh your experienced employees' understanding of safe operating procedures.

Our certified instructors will provide your employee with a comprehensive program that covers all aspects of the lift truck operation, including:

- Pre-start safety inspections
- Moving the truck
- Design considerations
- Setting down the load
- Picking up the load
- OSHA reminder points

Prerequisite: Some forklift knowledge and experience as a driver.

Receive a Certificate of Completion from the National Safety Council and McFatter Technical College.

National Safety Council trainers provide forklift training that is effective and OSHA-compliant, and employ NIOSH training and coaching.
